## One Word Substitution

108. One who feeds on human flesh

- A. Cannibal      B. Cannibale
- C. Cannibil      D. Cannibali

109. A person who is blindly devoted to an idea

- A. Chauvinist      B. Chavinist
- C. Chauvinst      D. Chauinist

## Idiom phrases

(110) In the following question, out of the four alternatives, select the alternative which best expresses the meaning of the idiom/phrase.

**Out of print**

- (a) Not able to print due to being short on paper
- (b) A book no longer available from the publisher
- (c) Intentionally not mention some items in the article or book
- (d) All publishers refuse to publish your book

(111) In the following question, out of the four alternatives, select the alternative which best expresses the meaning of the idiom/phrase.

**Kick the bucket**

- (a) Loose temper
- (b) To delay a little longer
- (c) To die
- (d) To meet with an accident

## Antonyms

112. parsimony is most opposite to

- a. generosity
- b. sinfulness
- c. verbosity
- d. tenderness

113. truculent is most opposite to

- a. faltering
- b. gentle
- c. facile
- d. submissive

114. spurious is most opposite to

- a. disingenuous

## ANSWER SHEET

### MATH – 10

#### 1. Ans. C

Check which ratio has A's and C's income in 2: 3 and B's and D's income in 1 : 2 Option 3 and option 4 have correct ratio. Now check either option 3 or 4 has A's income 140 more than B . so correct option is 3.

Ratio of A's and c's income ic =  $2x : 3x$

B's income =  $2x - 140$

D's income =  $3x - 80$

According to the question

$$= \frac{(2x - 140)}{(3x - 80)} = \frac{1}{2}$$

$$\Rightarrow 4x - 280 = 3x - 80$$

$$\Rightarrow 4x - 3x = 280 - 80$$

$$\Rightarrow x = 200$$

$$\text{Income of A} = 2 \times 200 = 400$$

$$\text{Income of B} = 400 - 140 = 260$$

$$\text{Income of C} = 3 \times 200 = 600$$

GET IT ON  
Google PlayGET IT ON  
Google Play

**Income of D = 600 – 80 = 520**

**2. Ans-a.**

let the rate of painting = Rs  $\chi$  /metre<sup>2</sup>

$\therefore$  Length x breadth x  $\chi$  = Rs 120

Length x (breadth - 4) x = Rs

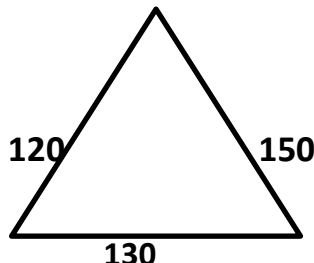

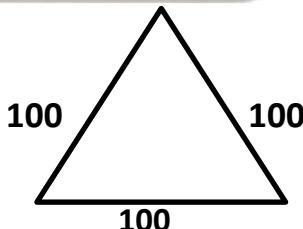

100 ... (ii)

from equation (i) and (ii)

$$\frac{\text{breadth}}{\text{breadth}-4} = \frac{120}{100} = \frac{6}{5}$$

$$\text{Breadth} = 24 \text{ m}$$

**3. Ans. B**

Perimeter of equilateral triangle =  $100 + 100 + 100 = 300$

Perimeter of equilateral triangle =  $120 + 150 + 130 = 400$

$$\% \text{ increase} = \frac{100}{300} \times 100$$

$$= 33\frac{1}{3}\%$$

**4. Ans. B**

Ratio of speed = 2 : 3 : 6

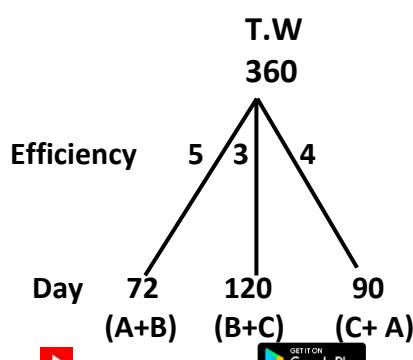

L. C. M of 2,3,6,= 6

$\therefore$  Total distance = 6km

$$\text{Ratio of time} = \frac{6}{2} : \frac{6}{3} : \frac{6}{6}$$

$$= 3 : 2 : 1$$

**5. Ans. C**

$$2(A + B + C) = 12 \text{ units/day}$$

$$(A + B + C) = 6 \text{ units/day}$$

In 3 days work.

$$A + B + C \text{ will do } = 6 \times 3 = 18 \text{ units}$$

In 3 days the part of work will

$$\text{Finish in} = \frac{3 \text{ days work}}{\text{T.W}} = \frac{18}{360} = \frac{1}{20}$$

**6. Ans. A**

$$(T.W) 12 \xrightarrow{\text{efficiency 1 units/day}} 12 \text{ day (A) time}$$

After 3 days A finishes 3 units work left  $= 12 - 3 = 9$  units

$$9 \text{ units} \xrightarrow{3 \text{ units/day}} 3 \text{ days (A + B)}$$

$$(A + B) \text{'s one day work} = 3 \text{ units}$$

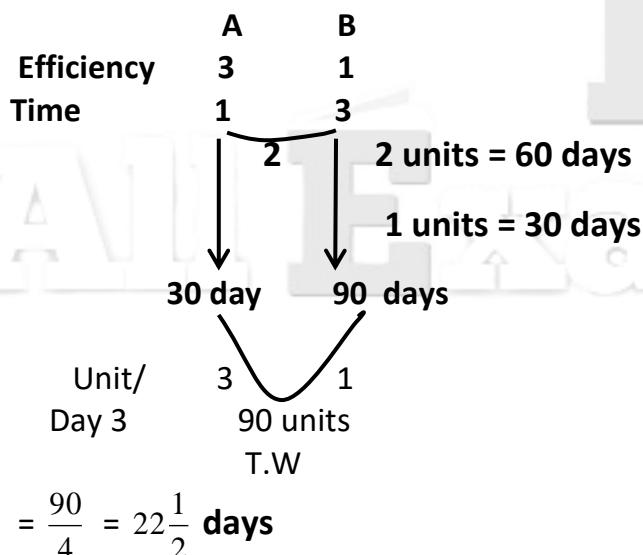

$$A \text{'s one day work} = 1 \text{ unit}$$

$$B \text{'s one day work} = 3 - 1 = 2$$

$$B \text{ completes whole work in} = \frac{\text{T.W}}{\text{efficiency}} \Rightarrow \frac{12}{2} = 6 \text{ days}$$

**7. Ans. B**

Efficiency is always inversely proportion to time

**8. Ans. C**

$$(x) + (x + 6) + (x + 12) = 63$$

$$3x + 18 = 63$$

$$3x = 45$$

$$X = 15$$

$$\text{So largest no} = 15 + 12 = 27$$

**9. Ans. C**

Let the number is 'x'

According to question

$$3(2x + 9) = 75$$

$$(2x + 9) = 25$$

$$X = \frac{16}{2} = 8$$

**10. ANS-(c)**

Total run scored in first 10 over =  $3.2 \times 10 = 32$

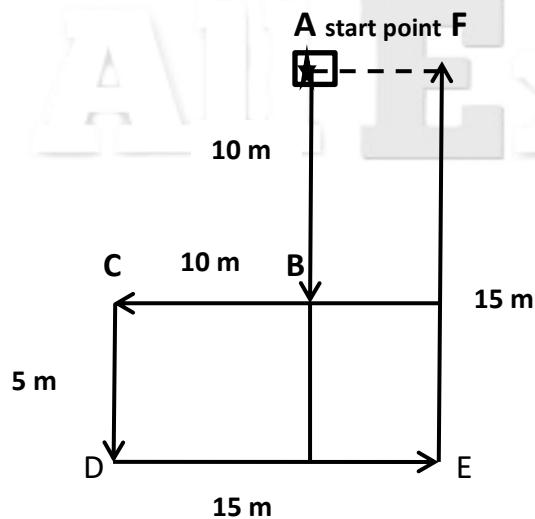

Run scored in remaining 40 Overs =  $282 - 32 = 250$

$$\begin{aligned}\text{Required run rate to win the Match} &= \frac{250}{40} \\ &= 6.25\end{aligned}$$

**Wife of Vinod's father means the mother of Vinod,  
Only brother of Vinod's mother means maternal uncle  
of Vinod. Therefore, Vinod is cousin of Vishal.**

**G.S.**  
**HISTORY**

**16. Ans. (b)**

Viscount Palmerston was the British Prime Minister during the revolt of 1857. His tenure was from 1855 to 1858 and 1859-1865.

**17. Ans. (b)**

The revolt of 1857 failed due to lack of common strategy and central organization. This was one of the major reasons of the failure of the revolt of 1857. All the groups participated in this revolt for their interests. There was no feeling of nationalism behind the mutiny and lack of clear vision.

**18. Ans.(a)**

Lord Wellesley (1798-1805) cleverly used a subsidiary alliance as a tool to make Indian provinces puppets of Britishers. He did not discover this method. This method was in practice earlier also but it gradually evolved and the final shape was provided by Wellesley. Dupleix was the first European to give his army to an Indian ruler on the promise of a fixed payment to the Company. Britishers used these tactics too. First Subsidiary Alliance was signed in 1765 with Awadh where Company promised to protect the boundaries of Awadh on a fixed payment to the Company. The evolved version of the Subsidiary Alliance was accepted by the Princely states in the following Sequence- Hyderabad (1798 and 1800), Mysore (1799), Tanjore (October 1799), Oudh (Nov 1801), Peshwa (Dec 1802), Bhonsle of Barar (Dec 1803), Sindhiya (Feb 1804), Jodhpur, Jaipur, Machheri, Bundi and Bharatpur.

**19. Ans. (b)**

The doctrine of Subsidiary Alliance System was introduced by Lord Wellesley, British Governor-General of India from 1798-1805. He also adopted a policy of non-intervention in the princely state but later adopted the policy of Subsidiary Alliance. The Nizam of Hyderabad was the first to enter into such an alliance.

**20. Ans. (b)**

The British East India Company was the first to establish its factory at Surat among all European trade companies. Jahangir granted permission to the British to set up a permanent factory at Surat, in 1613. The Dutch established a factory in Surat in the year 1616 while the French in the year 1668.

**21. Ans. (d)**

Bombay was given as a dowry gift by the Portuguese Crown to the British when H.M. Charles II, the King of England married Catherine of Braganza, the Princess of Portugal in 1661. Charles II gave Bombay to British East India Company on 10-pound annual rent in 1668.

**22. Ans. (b)**

The British Governor of Bombay, John Child, cordoned off Mughal ports of Bombay and Western coastal areas in 1688 and tried to capture Mecca pilgrims. As a result of which Aurangzeb ordered to expel him from India. He was forced to negotiate for peace and bent to his knees before the Mughal Emperor.

### 23. Ans (a)

During the first half of 19th century, British policies have turned India as exporter of raw material and consumer of finished product. Also because of Industrial Revolution in Britain, new machines were invented which were used to make handicraft products which were not just cheap but also of good quality which lead to downfall in demand of Indian handicraft products in domestic market too. Already they were unable to sell Indian goods at Britain because of high tariffs. All this led to ruins of Indian handicrafts.

### 24. Ans.(c)

The Permanent Settlement (1793 AD) introduced by Lord Cornwallis and also known as Permanent Settlement of Bengal was an agreement between East India Company and Bengali landlords to fix revenues to be raised from the land. It is also known as Ist-e-Marari, Jagirdari, Maalguzari, Bishvedari etc.

The Permanent Settlement of Bengal stood on the following features - It recognized the landlords as the proprietors of the land. It also recognized the rights of a hereditary successor or lawful successors of the landlords. The government believed that these landlords would remain faithful to the British. The landlords were given the right to transfer or sell their land. All the rights of the landlords depended on their payment of the fixed revenue on the fixed date at the treasury of the government. All their rights ended if they failed to pay. The total amount of revenue to be paid by each landlord for his Zamindari was fixed once for all. It was agreed that the tax rate would not increase in the future.

### 25. Ans. (b)

The reason for not issuing patta by many Zamindars was that there were no officials check on Zamindars in permanent settlement of 1793. They were only required to give 10/11<sup>th</sup> (89%) part of the revenue collection to the officials.

## POLITY

### 26. Ans.(a)

According to Article 217(1)(b), a Judge of High Court may be removed from his office by the President in the manner provided in clause (4) of Article 124 for the removal of a Judge of the Supreme Court. So statement 1 is correct. According to Article 220, No person who, after the commencement of this Constitution, has held office as a permanent Judge of a High Court shall plead or act in any Court or before any authority in India except the Supreme Court and the other High Courts.

### 27. Ans.(a)

According to Article 217(1)(a), a Judge of High Court may, by writing under his hand addressed to the President, resign his office.

### 28. Ans.(c)

**According to Article 257(1) of the Indian Constitution, the executive power of every State shall be so exercised as not to impede or prejudice the exercise of the executive power of the Union, and the executive power of the Union shall extend to giving such direction to states as may appear to Government of India necessary for that purpose.**

## **ECONOMICS**

**36. Ans. (a)**

The first Disinvestment Commission in India was formed in 1996 under the chairmanship of GV Ramakrishna. Till August, 1999, this committee gave recommendations related to 58 public industries. Based on the recommendations of the Commission, on March 16, 1999, public sector enterprises were divided into two parts, strategic and non-strategic, for disinvestment.

**37. Ans. (a)**

In 1991, the Government of India announced a new economic policy in relation to various aspects of the national economy. Economic liberalization is the main feature of the new policy. It began with the abolition of the 'licensing system' in respect of all industries except those of special importance.

**38. Ans. (b):**

The Second Industrial Policy of India (1956) laid down the concept of 'joint sector'. Accordingly, the emphasis was on development along with public and cooperative sector to accelerate industrialization.

**39. Ans: (b)**

The Direct Benefit Transfer of LPG (DBTL) or PAHAL (Pratayaksh Hastanrit Labh) is the initiative scheme for LPG subsidy aimed at transferring government benefits directly to public bank accounts has been included in the Guinness World Record as the world's largest direct benefit scheme. The scheme has been launched by the Government of India on November 15, 2014 from 54 districts of the country. This scheme was expanded to 622 districts of the country from January 1, 2015.

**40. Ans. (a):**

Economic reform is a major concept. It is often interpreted in terms of the lowest government control, the lowest government prohibition, the greater participation of private companies, the lowest rate of taxes, etc. Therefore, the establishment of new public undertakings is considered the opposite, whereas in government or public undertakings the government the process of selling the stake of the company is called disinvestment. The process of disinvestment is compatible with economic reforms. The government gets the money used in development schemes. But the process of disinvestment promotes decentralization, although the government acquires some of its share in the disinvestment process, but its ownership remains.

Novoselov discovered it in 2004. The both were awarded Nobel Prize' in 2010 for the discovery of Graphene. They extracted Graphene from a piece of Graphite. Graphene is a bi-dimensional element and due to this quality, controlling electricity is easier in it than a tri-dimensional element. Graphene is not only very thin but also strongest among all the materials tested so far. It is almost transparent, despite, being so dense that the smallest gas molecule cannot pass through it. It can be used as 'conducting electrodes' required for touchscreens, LCDs and organic LEDs. Graphene is used in computer chips, communication devices and touchscreens etc.

**50. Ans.(a)**

Hard water has high mineral content caused by the dissolved Magnesium Sulphate or Calcium Sulphate. This is due to the permanent hardness of sulphate salts which do not decompose on heating. Diamond is the hardest substance. By volume, dry air contains about 78% of Nitrogen. Vanaspati ghee, a fully or partially hydrogenated vegetable cooking oil is often used as a cheaper substitute for ghee. So, only statement 1 and 2 are correct.

**51. Ans.(a)**

The electrical conductivity of a semiconductor at absolute zero temperature is zero and they behave like an insulator At this temperature their electric resistivity becomes infinite,

**52. Ans. (b)**

Germanium and silicon are the main elements which are used as a semiconductor in transistors. Their conductivity on the normal/room temperature lies between the conductivity of conductors and insulators,

**53.Ans. (b)**

A convex lens is thicker in the middle and thinner at the edges. Rays of light that pass through the lens are brought closer together. A convex lens is also called a converging lens. A convex lens is used in reading glasses and it also used to remove the defect of far-sightedness.

**54. Ans. (b)**

A concave lens is used to minimize the defect of myopia.

**55. Ans. (b)**

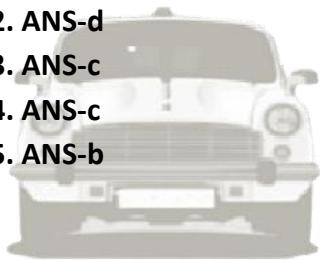

Myopia or near-sightedness is a refractive error which means that the eye does not bend or refract light properly to a single focus to see the image clearly. In Myopia, close objects look clear but distant objects appear blurred. It is corrected by using a concave lens.
